INSPIRATION_ Alto Atacama is the result of the humble dream of a Chilean Family, inspired by the magnificence of this land that seemed from another world.

They dedicated years strengthening ties with the local communities, to change the way hospitality was presented in the region, and to develop an environmentally conscious project.

Only professionals with an honest commitment to preservation and respect for the local communities were involved. More than 6 architects and designers collaborated together,

to create a Lodge in peaceful harmony with the natural surroundings. The Hotel opened in 2007 and was considered one of the greatest architectural achievements in Chile, making Alto Atacama a truly indescribable place.

The imposing mountain peaks that surround the Lodge will give you a panorama of infinitely varying chromatic colors throughout the day. All followed by the total darkness and silence of the desert night, lit by a countless number of stars.

The mission was to substantially involve the people of Atacama, to empower them to share with the world the unique place they

built their culture, and to preserve and maintain the landscapes for future generations. The spirit that inspired the dream stays alive; more than half of the staff are local and undergo constant training, making a difference in their lives by providing opportunities for a better future for them and their families, and giving them the pride in promoting the place and heritage of their descendants, who dominated the driest lands of the Andes.
