## ON ARRIVAL

### Body Bioimpedance Analysis (BIA)

A BIA with a Kamalaya nurse is included with every Kamalaya stay. BIA is a method of measuring several key health markers, including levels of hydration, the ratio of body fat against lean muscle mass, and cellular vitality. It is useful for setting goals for weight management and fitness, and for making appropriate recommendations to achieve a better body balance to improve overall health and prevent illness. Body Bioimpedance Analysis gives valuable information on cellular health, metabolism and toxicity to help create naturopathic, nutritional, or exercise programs suited to your individual needs.

### Wellness Consultation

An Wellness Consultation is included with every Kamalaya stay. During this consultation, one of our Wellness Consultants will talk with the guest about their wellness concerns and goals and then advise on the best treatment plan to maximise the benefits of their stay. Recommendations for additional treatments and therapies may be offered and programs can be personalised as required.
